

# Multi-Unit Charger

Model: KMC-6

Applicable to KBC-200

## Product Introduction

The Multi-Unit Charger KMC-6 is a product that integrates fast charging and high-speed data acquisition, allowing it to charge the body camera and additional batteries simultaneously. Moreover, when KMC-6 is connected to computer with the integrated docking software, it automatically acquires evidence from the body camera. During this process, the system protects all data using a HASH algorithm to keep the integrity of the evidence, ensuring that the data cannot be accessed or extracted through any other devices or software.

## Highlights

- **Fast charging**  
Support charging 6 body cameras and 6 batteries simultaneously.
- **Fast acquisition**  
Acquire evidence simultaneously from 6 body cameras, and supports USB 3.0 data transfer standard, enable acquisition while charging.
- **Plug and play**  
The design of grooves with contact makes acquisition and charging wirelessly.
- **Water and dust proof**  
Withstand the dust and water relying on the injection molding so you can use it in harsh environments.

SPECIFICATIONS	
Weight	900 ± 30 g
Power supply	100-240 VAC
Output voltage/current intensity	DC 5V/2A
